REMARKS/ARGUMENTS

Claim 1 in the application has been amended to provide additional details of the front face of the insert and the overlap of the front face with the hinged panel interlock. This arrangement maintains the alignment of the plastic panels and it also serves to separate the roller head from the edge of the panels. The cited patent Lucas United States Patent 2,951,533 does not have this relationship and does not have any disclosure of this type of insert.

Former dependent claims 5 and 7 were all dependent upon claim 1 but were otherwise allowable. Each of these claims has been now rewritten in independent format.

In light of the amendment to claim 1, dependent claim 2 has been amended. Former dependent claims 5 and 7 were indicated as being allowable if rewritten independent format. As such, amended independent claims 5 and 7 are believed to be allowable.

In view of the above, reconsideration and allowance of the application is requested.

Respectfully submitted,

Agent on behalf of Applicant
